Client Results

We represent global leaders in aerospace and defense. In addition to managing all legal needs, we have provided historic patent support for one of the major U.S. defense contractors.

Comprehensive Legal Services

With a rich understanding of the field, we efficiently provide an entire portfolio of needed legal services for this vastly complex and regulated industry.

Overview

Munck Wilson Mandala has experience representing inventors, startups, and global clients who are considered masters of the aerospace and defense industry. Our attorneys apply their backgrounds in defense, engineering, and aerospace to bring result-oriented advice and creative solutions for this complex and heavily regulated industry.

We offer an extensive support system that combines whip-smart lawyers with engineering degrees and field experience with experts in regulatory and defense law. Many of our attorneys previously worked in or led teams in defense and aerospace companies before going to law school. Our attorneys have worked closely with clients to manage federal privacy, security, surveillance, compliance, trademark, and litigation.

Munck Wilson Mandala has a longstanding relationship with Raytheon, one of the major U.S. defense contractors and industrial corporations. Our team historically worked with Raytheon Technologies as they received the 10 millionth patent issued by the United States Patent and Trademark Office (USPTO).

No Texas firm is more aggressive in intellectual property law than Munck Wilson. And Bill Munck predicts that new technologies will lead the firm to dramatic growth in lawyer headcounts and geographic expansion in 2023.
